

Behavior-Driven Development for Agile Teams

Support better collaboration between developers, testers, and product owners by adopting behavior-driven development (BDD)—a practical technique that helps teams build the right thing, the right way.

 **Live | Instructor led**

Duration:
5 hours

Credential:
Microcredential

Languages:
English

Who it's for

- Developers, testers, and QA professionals
- Product owners and product managers
- Scrum masters and agile coaches supporting technical teams

Why it matters

Behavior-driven development improves product quality and team alignment by turning requirements into clear, testable behaviors—reducing rework and increasing confidence in what's delivered.

Bundle with: Agile Essentials, Scrum Essentials, Agile OKRs

Key learning outcomes

- Understand the purpose and benefits of behavior-driven development
- Use BDD to enhance collaboration across technical and non-technical roles
- Write effective scenarios using Given/When/Then syntax
- Align development with business goals through shared understanding

Course modules

1. What is Behavior-Driven Development?
2. BDD and Agile Collaboration
3. Writing Effective Scenarios
4. The Power of Examples
5. Scrum and BDD
6. Bringing BDD to Your Team

"Simply amazing learning experience!"
