

Scrum for Project Managers

Optimize your delivery architecture by equipping project managers with the versatility to lead in any environment. This course is engineered for the modern enterprise, where the ability to deploy the right tool for the right problem is a competitive necessity. This course equips project managers to integrate their existing strategic rigor with scrum practices—eliminating the friction between legacy planning and agile execution.

 **Live | Instructor led**

Duration:
8 hours

Credential:
Microcredential

Languages:
English

Who it's for

This course is engineered for high-impact leaders responsible for navigating complexity and mobilizing strategy:

- Project & Program Leaders charged with integrating scrum into high-stakes enterprise initiatives.
- Portfolio Managers seeking to synchronize diverse delivery streams in hybrid or agile environments.
- PMO Directors tasked with aligning traditional governance with scrum execution.
- Business Analysts & Strategic Partners operating at the intersection of project-based goals and agile delivery.
- Enterprise Transitions Teams moving the organization from rigid predictive models to a high-performance, blended approach.

Why it matters for enterprises

In volatile markets, “one-size-fits-all” project management is an operational risk. Scrum for Project Managers transforms your delivery core into a precision engine, giving leaders the versatility to deploy the right framework for any complex challenge. By integrating scrum into a broader strategic toolkit, your organization ensures absolute agility at the project, program, and enterprise levels.

Key learning outcomes

- Increase delivery effectiveness by equipping project managers to bridge agile and traditional approaches
- Enable effective hybrid delivery using agile, scrum, and traditional practices
- Improve scrum team performance without disrupting core accountabilities
- Translate agile delivery choices into business and executive language
- Increase predictability through adaptive planning and forecasting
- Strengthen stakeholder alignment through improved transparency and communication
- Drive team effectiveness with actionable improvement plans

Course modules

1. The Business Value of Agile
2. Apply Scrum through Simulation
3. Scrum Roles
4. Project Initiation
5. Adaptive Planning
6. Retrospective

“Great content. Awesome instructors.”
