

Visual Thinking for Effective Collaboration

Visual Thinking for Effective Collaboration equips professionals with a practical capability for today's workplaces: making complex ideas visible. In this course, participants learn how to use simple visual techniques to align with one another and turn conversations into actionable outcomes.

 **Live | Instructor led**

Duration:
4 hours

Credential:
Microcredential

Languages:
English

Who it's for

- Leaders and managers guiding cross-functional teams
- Educators, facilitators, and coaches
- Scrum masters and agile practitioners
- Product owners and product managers
- Project and delivery professionals
- Organizations seeking faster alignment and better collaboration

Why it matters for enterprises

Misalignment is one of the highest hidden costs in modern organizations. Visual Thinking for Effective Collaboration equips teams with practical tools to understand complex work, align stakeholders quickly, and make better decisions together. The result: stronger collaboration across the organization, leading to faster execution and reduced rework.

Key learning outcomes

- Turn abstract ideas into clear, shared visuals
- Create alignment across teams and stakeholders
- Accelerate decision-making using visual narratives
- Build a practical library of simple visual symbols
- Organize complex conversations using visual structures
- Facilitate meetings that drive action
- Translate strategy and workflows into understandable models

Course modules

1. Visual Thinking: The Foundation of Communication
2. The Visual Building Blocks
3. Organizing for Alignment: Visual Structures
4. Synthesizing to Make Sense

"One of the highlights of my learning journey was the supportive and knowledgeable instructors."

— Scrum Alliance member
